

CONTENTS

Vol. 63, 2017

	Page
On a property of the simple random walk on \mathbb{Z} by Norio Konno, Hayato Saigo, and Hiroki Sako	1
Characterizations of graphs to induce periodic grover walk by Yusuke Yoshie	9
A property for the formula of the sectional classes of classical scrolls by Yoshiaki Fukuma	25
Existence and uniqueness of solutions for a class of a singular fractional initial value problem by Toshiharu Kawasaki and Masashi Toyoda	41
Stationary measures of three-state quantum walks on the one-dimensional lattice by Hikari Kawai, Takashi Komatsu and Norio Konno	59
N -Flips in even triangulations on the projective plane preserving chromatic number by Yuki Kawasaki and Atsuhiko Nakamoto	75
Iterative approximation with errors of zero points of monotone operators in a Banach space by Takanori Ibaraki	91
Truncated 3-regular connected graphs are distinguishing 3-colorable by Masayuki Fujita and Seiya Negami	111
Quadrangulations on the projective plane with a $K_{3,4}$ -minor by Naoki Matsumoto, Atsuhiko Nakamoto and Shin-ichi Yonekura	117
